Fiscal Analysis:

ASSUMPTIONS:

Department of Environmental Quality (DEQ)

1. HB 582 prohibits the department from issuing an air quality permit to a facility proposing to combust or incinerate polyvinyl chloride (PVC). Analysis of the proposed application to determine the potential presence of PVC will create only a marginal increase in workload, will be implemented with existing staff, and will require limited additional expenditures.
2. The prohibition on incinerating or combusting PVC at existing permitted sources will be integrated as permit conditions through existing permit processes, such as renewal of Title V permits. This will create only a marginal increase in workload, will be implemented with existing staff, and will require no additional expenditures.
3. The addition of a requirement prohibiting incineration of PVC in existing sources, including some non-permitted sources, will create only a marginal increase in compliance staff workload associated with regulating non-permitted sources, will be implemented with existing staff, and will require no additional expenditures.
